EDUCATION

B.S. in Computer Science | COMSATS University (Islamabad, Pakistan) Oct 2014 – July 2018

Coursework: Data Structures and Algorithms, Data Science, Machine Learning, Entrepreneurship and Project Management

EXPERIENCE

Biome Analytics

- Principle Data Engineer | Tools: SQL, Python, PySpark, Linux, Git, Ascend, Talend** Feb 2019 – Present
- Promoted to Principal Data Engineer within five years, demonstrating strong technical expertise and leadership
 - Designed and developed 15+ SQL-based ETL pipelines for cardiovascular registries, streamlining data processing within two years
 - Part of the team that led the transition from a SQL-based data ecosystem to a PySpark-based infrastructure, enhancing scalability and efficiency within a year
 - Optimized ETL workflows, reducing execution time by 50% and improving overall system performance
 - Automated over 100 routine tasks, minimizing manual intervention by 80% and increasing operational efficiency
 - Managed a Data Operations Team of eight members, overseeing 60+ end-to-end cardiovascular data registry and administrative releases per month while processing 8,000+ data submissions
 - Resolved complex data issues by performing ad hoc analysis and addressing over 1,000 Jira tickets
 - Facilitated cross-team collaboration between the Data Operations Team and Client Services Team to ensure seamless data delivery
 - Contributed to operational and data delivery management as part of the General Management Team
 - Partnered with the Data Quality Assurance Team to develop test cases for new features and data pipelines, ensuring data integrity
 - Served on the interview panel for hiring new talent, evaluating candidates for technical and operational roles

ACADEMIC PROJECTS

- Roman Urdu Sentiment Analysis System | Tools: MongoDB, Python, ML, Beautiful Soup** Jan 2018
- An automated solution for analyzing customer feedback and opinions using sentiment classification
- Campus Management System | Tools: MySQL, Python, PHP, REST APIs** Mar 2017
- Developed a Campus Management System to streamline administrative tasks, student records, and academic management processes

CERTIFICATIONS

- HIPPA, HiTrust, Healthcare Datawarehouse Training** (Illinois, Chicago) June 2022 – Oct 2023
- Data Science with Python Track** – Data Camp Feb 2019

SKILLS

- Languages:** Python, Java, C/C++, Spark **Cloud:** AWS (RDS, EC2, Redshift, S3, IAM), Azure, GCP
- Database:** MySQL, PostgreSQL, MongoDB, Hadoop, MapReduce
- Data Analytics:** NumPy, Pandas, NLTK, SpaCy, Beautiful Soup, MS Excel
- Data Visualization:** Matplotlib, Seaborn, Plotly, Power BI, Tableau
- Software Tools:** Git, Linux, Jupyter Notebook, Confluence, Jira, Docker, Databricks, Snowflake
- Soft Skills and Interests:** Chess, History Enthusiast
